Frontend developer and recent Information Technology graduate of FPT University Đà Nẵng (10/2026), working with React, Next.js, and TypeScript, and able to work full-stack with ASP.NET Core. Completed a Java internship (Spring Boot, SQL) at FPT Software and worked in an Agile/Scrum process. Seeking a Frontend Developer role in Hà Nội.

Education

FPT University — **Đà Nẵng, Vietnam**
Bachelor of Information Technology — *2022 – 10/2026*
Graduated October 2026.

Core Competencies

- **Frontend**: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Vue.js
- **Backend**: ASP.NET Core 8, EF Core, Spring Boot (Java), Node.js, SignalR, RESTful APIs
- **Databases**: SQL Server, PostgreSQL, MySQL, Supabase, MongoDB
- **DevOps & Tools**: Git/GitHub, Docker, Vercel, Postman, Claude Code, Agile/Scrum
- **Languages**: Vietnamese (native), English (fluent), Japanese (basic)

Professional Experience

FPT Software — **Đà Nẵng, Vietnam**
Java Developer (Intern) — *01/2025 – 05/2025*

- Developed and maintained Java application modules using Spring Boot and SQL databases.
- Collaborated within the engineering team following the Agile/Scrum process.

Independent Projects

Graduation project (team of 4), live at tmpms.io.vn
TMPMS – Full-stack Developer — *06/2026 – 10/2026*

- Built a traditional-medicine (Đông Y) pharmacy platform combining e-commerce, online diagnosis, and appointment booking with deposits.
- Designed a layered backend using ASP.NET Core 8 and EF Core on SQL Server with JWT + Identity authentication.
- Developed real-time pharmacist chat and an intelligent chatbot via SignalR integrated with Gemini AI.
- Implemented FEFO inventory management, deposit bookings, automated flash sales, and PayOS payments with idempotent, signature-verified webhooks; built the React 19 + Vite frontend and deployed with Docker.

Independent project, live at trackingtours.vercel.app
Tracking Phượt – Creator & Sole Developer — *10/2026*

- Reconstructed animated route maps from GPS data embedded in trip photos (including HEIC) using MapLibre GL and actual routing via OSRM.
- Built the backend and database on Supabase (Postgres, Storage, Google OAuth) with edit-token-based trip ownership.
- Implemented 3 video-export pipelines (screen recording, frame-by-frame canvas capture, Puppeteer + ffmpeg server rendering) and automated TikTok posting via Content Posting API.

Independent project, live at dressroom-eight.vercel.app
Việt Phục Các – Ancient Attire Fitting Room – Creator & Sole Developer — *09/2026*

- Built an interactive paper doll multi-layer PNG costume system (robes, headwear, pants, shoes, accessories) with 3D Paper Shadow-Box tilt and Z-depth.
- Developed a royal costume dye studio for 6 Nguyễn Dynasty color palettes using isolated CSS filters on garments without color bleeding.
- Integrated HD Lookbook export (768x1376) using HTML5 Canvas 2D multi-layer compositing with royal seal stamping and calligraphy titles.

Achievements

- Top 500 Finalist – AI Riser Vietnam 2026 (Google for Developers) — 10/2026
