☆ PROFILE

Final-year Information Technology student at **FPT University Da Nang** (expected graduation Dec 2026), with hands-on experience building full-stack web applications. Delivered the graduation project **TMPMS** end-to-end — from requirements analysis and database design to API development and UI implementation — and built **Tracking Phượt**, a web app that turns GPS photo data into animated route maps with automated video export. **Clear product thinking**, a proactive work ethic, and a focus on shipping working software quickly. Looking to join a team as a full-stack developer.

📁 WORK EXPERIENCE

Java Developer (Intern)

01/2025 – Present

FPT Software Da Nang

- ▶ Developed and maintained **Java application modules** in a real enterprise environment.
- ▶ Debugged, tested, and optimized code on **large-scale systems**.
- ▶ Collaborated with the team following a professional **Agile/Scrum** process.

📁 FEATURED PROJECTS

TMPMS GRADUATION PROJECT · SOLO

Traditional-medicine pharmacy platform — e-commerce, diagnosis & appointments, live at tmpms.io.vn

ASP.NET Core 8 · C# · EF Core · SQL Server · React 19 · Vite · SignalR · Docker

- ▶ Designed a layered **ASP.NET Core 8 / EF Core** backend on **SQL Server**, with **JWT + Identity** auth.
- ▶ Built real-time pharmacist chat & AI chatbot via **SignalR**, backed by **Gemini AI**.
- ▶ Built **FEFO inventory**, appointment booking with deposit holds, and automated **flash sales**.
- ▶ Integrated **PayOS** payments with idempotent, signature-verified webhooks.
- ▶ Built the **React 19 + Vite** frontend and deployed via **Docker** to production.

Tracking Phượt SOLO · FULL-STACK

Turns motorbike-trip photos into an animated route map, computed automatically from photo GPS data

Next.js 15 · TypeScript · Tailwind CSS · Supabase · MapLibre GL · Framer Motion · Puppeteer

- ▶ Parses **GPS from photo EXIF data** (including HEIC) and computes the real route and distance via OSRM.

- Built a **riding-marker animation** along the route on the map (MapLibre GL) that stops at each photo location.
- Built the **backend and database** on Supabase (Postgres + Storage + Google OAuth), including the trip/photo schema and edit-token-based ownership.
- Implemented **three separate video-export pipelines** — screen recording, frame-by-frame canvas capture, and server-side rendering (Puppeteer + ffmpeg) — for consistent output regardless of the viewer's device.
- Integrated **automatic video posting to TikTok** via the Content Posting API.
- **Redesigned the UI/UX** across the home page, trip list, and trip view into a responsive dark-glassmorphism style.

 SKILLS

Languages	JavaScript, TypeScript, Java	Database	MySQL, MongoDB, PostgreSQL
Frontend	React, Next.js, Vue.js, Tailwind CSS	Tools	Git/GitHub, Postman, Vercel, Supabase
Backend	Node.js, RESTful API	Other	Agile/Scrum

 STRENGTHS

- ◆ Builds and **ships end-to-end products**, not just code.
- ◆ Clear systems thinking, from **schema design** to real production operations.
- ◆ Comfortable across multiple frontend frameworks (React/Next.js/Vue) and **both SQL and NoSQL**.
- ◆ Picks up new technology fast, and works efficiently with **AI-assisted development**.

 EDUCATION

Bachelor of Information Technology
FPT University Da Nang
2022 – 12/2026 (expected)

Vietnamese — native · **English** — conversational · **Japanese** — basic
